Hi Pete,

We don't have a replacement for Lynn or EPA's efforts on Area 40. She has been covering Area 40 and will be at the workshop today but she is in a new position and her involvement cannot continue indefinitely. Region 9 Superfund RPMs are short staffed by at least 30% compared to our historical levels. And, it turns out R9 is staffed at a lower level than many other Regional offices. We've got to the point where we can't do more with less and we need to just do less. That's one of the reasons DTSC took the lead on Area 40. I think it's important that DTSC staff is available to attend all public meetings, if for no other reason than to reassure the public that DTSC is fully invested as the lead agency.

Thanks and give me a call if you want to discuss,  
Daewon

Hi Lynn,

Bill will be responding to your email re: DTSC attendance at the workshop.

It was not clear from your email, are you still assigned the PM responsibilities for Area 40? If not, whom is the interim project manager assigned, Daewon? I noticed that Daewon is addressed on this correspondence.

Thank you for asking Tammy to attend, Pete—that is helpful. Is there any way Bill Beckman or Jim Rohrer could attend Weds on behalf of DTSC's technical folks?

As you know, based on feedback received from the last DTSC meeting and CAG meetings, we are trying to ensure the community is fully informed about the Area 40 cleanup as dictated in the RAP and help the cleanup move along smoothly. Any help DTSC could provide in getting that message out Weds would be appreciated.

Jackie is taking the lead on communications since I took a new job within the Superfund Division this year; I'm trying to help when possible but am currently doing a different job. EPA Region 9 is still very understaffed given the extent of the States and territories we cover, number of Superfund sites, and small number of RPMs on staff. EPA capacity issues were one of the reasons why having DTSC take the lead on the Area 40 cleanup made good sense, and we appreciate any support DTSC can provide on Weds.

Thanks,  
Lynn

Hi Jackie,

Thank you for the invitation to attend the USEPA community workshop. Unfortunately, I have a family birthday party to attend and will not be available. I've asked our Public Participation Staff, Tammy Pickens to be present and note/record any community concerns not resolved during the work shop discussions so a written response can be provided to the interested community member(s).

Regards,

-Pete

**Subject:** Personal Invite: Aerojet Area 40 OU-10 Workshop on July 10, 2019

Dear Peter and Alex:

I wanted to personally invite you both to the Aerojet Area 40 OU-10 Workshop on July 10, 2019 from 6pm to 8pm at the Folsom Community Center. As you know, the Aerojet CAG has been concerned about the City of Folsom residents knowing and understanding the OU-10 cleanup project, and they requested additional community involvement beyond DTSC's RAP community meeting last year. Also, the CAG is concerned that EPA will not be conducting its proposed plan public process prior to the State starting its cleanup. This workshop is an effort to kick-off EPA's public process that will follow completion of the RAP cleanup and the evaluation of meeting cleanup goals.

At the workshop, EPA plans to welcome, do introductions and talk about the purpose of the meeting. Aerojet will present the plan and schedule for the cleanup. We will follow this with a facilitated Q&A session. We will also have various poster boards around the room on the cleanup to help address attendees detailed questions.

We solicited help from the City of Folsom's Communication Office to reach more of its citizens through its bimonthly and weekly newsletters that reach 13K homes. Aerojet mailed the attached mailer to a new mailing list specifically for OU-10. The City of Folsom will have a poster board to help address development plan questions.

Especially since the RAP details the State-lead cleanup proposed for Area 40, EPA and the community would appreciate a DTSC and Water Board representative attending this Folsom community workshop on July 10 to lend your expertise to this effort.

Thank you,  
Jackie
